

In September 1971 when the Sub-Department of Ornithology was established at Tring, the Bird Section Library was transferred there. Ornithological books marked 'Z' in this printed catalogue may, therefore, be at Tring now, instead of, or as well as, in the Zoological Department Library. The card catalogues in the Catalogue Room have been altered to show present locations.

PREFACE

THE final letter of the alphabet is reached for the second time in this, the eighth volume of the whole series, and the third supplementary volume of the Museum Library Catalogue.

Thanks for assistance in the preparation of the volume are again due to those persons mentioned in the preface to Volume VII, and also to MESSRS. N. D. RILEY, C. WOOD, F. SAWYER, AND J. MUGFORD. Considerable assistance in the work of compilation and revision has also been given to the Librarian by MISS M. S. SMITH, Cataloguer in the General Library.

Some cross-references, especially in the earlier part of the volume, will be found referring to entries in a second, as yet unprinted, supplement of the Catalogue.

If circumstances allow, and if there appears to be a call for it, it is hoped to publish this second supplement at a future date.

C. FORSTER-COOPER.

Director.

British Zoology . . . Fourth edition. 4 Vol. *illustr.*

8°. Printed by W. Eyres : Warrington ;
B. White : London, 1776, 1777.

Each volume has an additional engraved title-page : "London.
Printed for Benj. White, 1776. (1777.)"

With the book-plate of John Blackburne, of Orford, son of the
Botanist of that name [1690–1786], and with his MS. notes, showing
the specimens in the Blackburne Collection in 1800–09.

Vol. 1 only bears "Fourth edition" on the printed title-page.
Vol. 1 & 2 are continuously pagged, and with Vol. 3 contain the whole
of the subject-matter of the second edition, the addenda in Vol. 4
of that edition having been inserted in their right places. The copy
in the Tweeddale Library has "Additions & Corrections" (3 pp.)
inserted before the index of Birds. Vol. 1–3 were published together
in 1776, and probably then counted as the third edition, being
simply reissued with the addition of Vol. 4 (Crustacea, Mollusca,
Testacea), which appeared in 1777 to form the present edition.
Vol. 4.

[Dedicated to Margaret Cavendish Harley, Duchess
Dowager of Portland.] [Engraved title only.] Crustacea,
Mollusca, Testacea. (Corrections of the spelling in the
Welsh names of Reptiles and Fishes in vol. 3 . . . with some
additions thereto, by Richard Morris, Esq.) pp. viii [xi] 154
[2] : 93 pls.

On the last page of Vol. 3 is an advertisement : In May next [1777]
will be published : British Zoology. Class V. By Thomas Pennant,
Esq., containing about ninety elegant plates of the Shell and Crus-
taceous Animals of Great Britain, with descriptions. N.B. This
work will be published both in Quarto and Octavo.

Pulteney (RICHARD) F.R.S. Catalogues of the Birds, Shells, and some of the more rare Plants of Dorsetshire. From the new and enlarged edition of Mr. [John] Hutchins's History of that county. pp. 92 : 1 port.

fol. London, 1799.

The portrait, "painted by T. Beach, engraved by J. Basire, from a picture presented by Mrs. Pulteney to the Linnean Society of London," was published by J. Nichols, April 3, 1804, in his "History and Antiquities of the County of Leicester." 4 Vol. 1795-1815. With photographic copy of Thomas Rackett's note, May 24, 1813, in his 1813 edition of this work, in the Library of the Linnean Society of London.

— [Another edition.] With additions, and a brief memoir of the author [by T. Rackett]. pp. iv, 110 : 24 pls., 1 port.

fol. London, 1813.

The Molluscan plates numbered I-XXIII are reprints of those in E. Mendes da Costa's "Historia naturalis Testaceorum Britannicæ," 1778, revised and altered, and augmented by six new ones, viz. pls. I, IV, V, XIII, XVIII, & XIX.

With photographic facsimiles of T. Rackett's note as to the first edition, and of his autograph presentation inscription on the flyleaf of the copy in the Library of the Linnean Society of London.

Pulteney (RICHARD) F.R.S. [A coloured set of the seventeen plates to Mendes da Costa's "Historia naturalis Testaceorum Britannicæ", 1778, and six others by Peter Mazell, as adapted by T. Rackett to illustrate the second edition of Pulteney's "Catalogues", 1813.] 23 pls., col.

4°. [1807.]

It had been intended to reissue Mendes da Costa's plates with seven others by P. Mazell under the title "Triton Britannicus" (Pulteney's "Catalogues", 1813, pp. 24), but the project was not carried out, and these plates were utilized and adapted by Rackett, as shown in this draft set, by cutting up and distributing the figures of Mazell's seventh plate in spaces on the Mendes da Costa plates, or in lieu of original figures which represented shells not occurring in Dorset.

The accompanying manuscripts are on paper watermarked "1805," whilst the blank paper inserted between the plates is dated "1807." The plates completed from this draft set were cited by W. G. Maton and T. Rackett in their "Descriptive Catalogue of the British Testacea" (Trans. Linn. Soc. Lond. Vol. 8. 1807) and copies were circulated with the reprints of that paper.

2. Second coup de fouet. Sur l'analyse microscopique des Cristaux qu'on trouve dans le tissu cellulaire du Cerveau du Pérou, par M. Turpin; et sur le Rapport de MM. Cassini et Chevreul relatif à ce Mémoire.

Raspail originally intended that these two "brochures," along with his "Ammonites" [1866], &c., should have formed the 3rd & concluding part of Vol. 4 of the *Annales des Sciences d'Observation*, but that serial, owing to political & other reasons was suspended after Part 2. Later he had them bound together to form a supplement volume to the *Annales*.

Raspail (F. V.) Histoire naturelle des Ammonites, suivie de la description des espèces fossiles (des Basses-Alpes de Provence, de Vaucluse et des Cévennes). pp. viii, 56 : 4 pls. 8°. Paris, 1842.

This edition was limited to 100 copies only. There are altogether nine plates illustrating this work which Raspail originally intended to publish in the *Annales des Sciences d'Observation* having already published the first five plates in advance (1829 & 30) in that serial, see Tom. 3, pls. 11 and 12 (= the first and second) and Tom. 4, pls. 1, 2 & 8 (= third to fifth). But at this date (1830) with Tom. 4, pt. 2, p. 320 the *Annales* was suspended, owing to political and other reasons, and so the sixth and seventh plates then ready for publication remained in abeyance until 1831, when a certain number were distributed to old subscribers for the *Annales* through the medium of a newly-founded journal *Le Lycée*, which published the beginning of the text to the "Ammonites," but the *Lycée* succumbed to the same machinations as the *Annales*, and again the work was laid aside & remained incomplete for ten years. The four plates accompanying the work (the sixth to ninth) Raspail has numbered "14," "15," "16," & "17," so as to form a sequence connecting them with Tom. 4 of the *Annales*, because the work, (along with his "Nouveaux coups de fouet scientifiques," &c.), was to have formed the third and concluding part of that volume [q.v.], and some years later Raspail had these works (and also two plates belonging to a memoir of his running in the *Annales*, "Essai de Chimie microscopique appliquée à la physiologie," &c.) bound together to form a "Supplement" to the *Annales*. The Museum copy is probably the only one in existence.

Raspail touches on the history of his troubles in connexion with the publication of his works, in the "Avertissement" to the above, but gives a fuller account in the "Avertissement" to his "New or Second" edition, published in 1866. [q.v. infra.]

1. Acroblastæ. pp. i-viii, 1-136, with "Addenda" and "Index". pp. 137-140. 1830.
[A second edition of pp. 3-4 was printed with sheet 12.]
2. Phylloblastæ. pp. 141-434, with "Index". pp. 435-438. 1831.
3. Calycanthæ. pp. 435-878. 1832.
[With this were:—A new title-page covering the whole work, dated "1830-32;" "Præmonenda." pp. i-iv; the accessory items, "I. Conspectus" &c. pp. ix-xxiv, "II. Expositio," &c. pp. xlv-l, "III. Index generum," &c. pp. 1-140; and the two maps; also new pages 137-140, 191-192, 435-438 to replace those previously issued with pp. 140-140^{as} of additional matter, and the "Nachricht für den Buchbinder."]
4. The "Clavis synonymica," pp. i-xxvii. 1833.
Two copies of this work are in the Botanical Department. One, in three volumes, has pp. i-l inserted immediately after the title-page to the first part, the fresh pages numbered 137-140, 191-192, and 435-438 substituted, and the additional pages 140-140^{as} inserted. The "Clavis synonymica" and the "Index generum" have been bound together to form the third volume. The other copy is bound in two volumes. It has the covering title-page and "Præmonenda" (pp. i-iv) placed in front of the original title-page to the first part. The new issue of pp. 3-4 has been substituted for the original, while the original indexes to the first two parts and the original pp. 191-192 are retained. On the other hand the new pages issued with the third part (except pp. 435-438) as well as the "Conspectus" and "Expositio" are wanting.

Reichenbach (H. G. L.) The "Register" is a list of the native names of the Plants with their Latin synonyms.

The "Index universalis" corresponds with the edition of 1755, appended to the "Auctuarium Herbarii Amboinensis," save that the native names of the Plants have been added, and in some cases the Linnean synonyms abridged to admit of their introduction. It is probably later in date than Burmann's "Index alter" issued with his "Flora Malabarica" in 1769.

SELIGMANN (JOHANN MICHAEL) [1720–1762] Sammlung verschiedener ausländischer und seltener Vögel, &c. 9 Tl. [in 4 Vol.] illust. col. fol. Nürnberg, 1749–76.

There are engraved titles to Tl. 1 & 2, bearing the inscription "Catesby und Edwards Sammlung seltener Vögel." The work consists, Tl. 1 & 2, of copies by Seligmann of the plates in G. Edwards' "Natural History of Uncommon Birds," and Tl. 3–9, of those in Catesby's "Natural History of Carolina," with translations of the English text of both works, by G. L. Huth. In Tl. 3, 5–9 the artist's name is given as Seeligmann, and Tl. 6–9 were brought out by his heirs. Tl. 7–9 are further described on the title-pages "als eine Nachlese zu G. Edwards Werken." Tl. 3 begins with the "Vorrede des Herrn Catesby" [pp. 6] followed by the "Beschreibung von Carolina," &c., [pp. 52] on the last page of which is an "N.B." correcting the translation of one paragraph. This section concludes with a "Vorbericht des Uebersetzers" [pp. 4] dated "4 October 1755."

— [Another issue] Tl. 3–9. illust. col. fol. Nürnberg, 1753–76.

Printed on thicker and rougher paper. Tl. 4 has an engraved title, which in addition to the German inscription bears the French equivalent in a single line along the top. In this issue the Catesby "Vorrede" and "Beschreibung" have been placed, as shown by the catchword, at the end of Tl. 3. They have been reprinted line for line in a different but very similar font and are preceded by an undated title-page, reading : "Die Beschreibung von Carolina, Florida und den Bahamischen Inseln . . . Von M. Catesby . . . In das Deutsche übersezt von G. L. Huth"—and a "Vorrede des Uebersetzers" [pp. 2] dated "4 November 1755."

The Journal contains articles written in European languages. Articles in the Bulletin and Journal are printed first of all as 'separate prints' and issued irregularly. When these 'separates' amount to a sufficient number of pages they are bound up as a volume and a title-page and list of contents are supplied. A résumé of every article appearing in the Bulletin and the Journal is given in one or the other according to which of the two contains the full paper.
